

Background information for the Advisory Group

This document provides a brief overview of the OCHA online information tools developed last year, which provide access to real-time information on allocations and other key data. The online tools include the CERF [online allocation tracker](#), the [CERF Data Hub](#) and the [Pooled Funds Data Hub](#).

CERF Allocation Tracker

The CERF online allocation tracker provides real-time information on each CERF allocation. With the development of the online tracker, CERF also offers the [service](#) that stakeholders can receive e-mail notifications of new CERF allocations as soon as these are decided.

Allocation Summaries

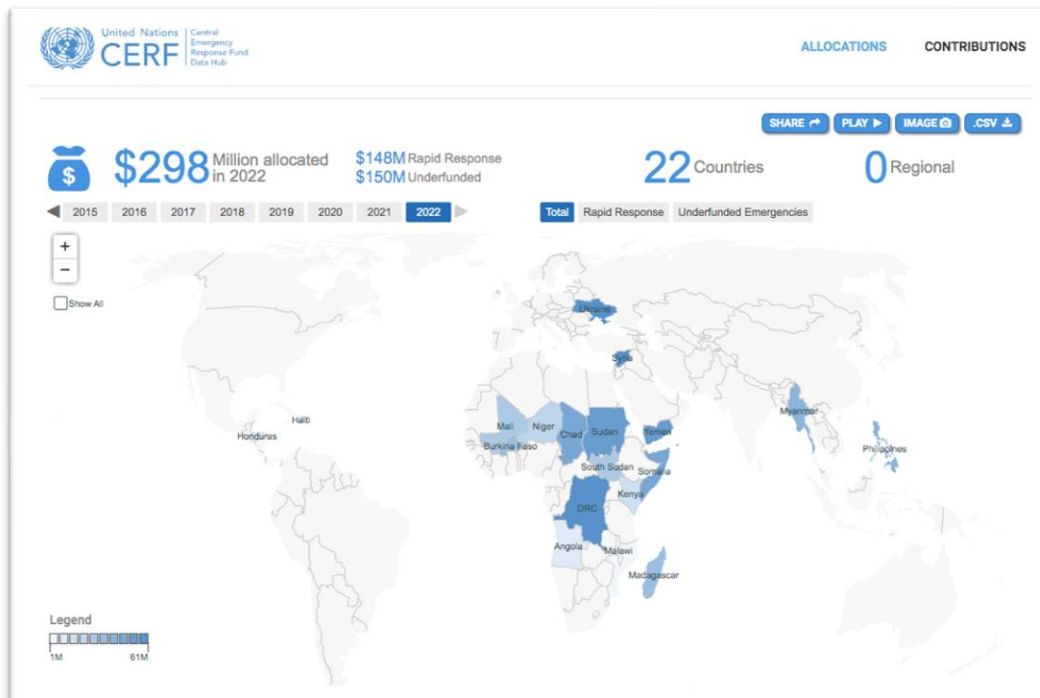

Allocation summaries are available since 2015 and project summaries since 2020.

CERF Datahub

The CERF Data Hub, provides a wide array of interactive visuals on CERF funding, allowing stakeholders to easily access data on how CERF grants are allocated across global humanitarian operations.

Pooled Funds Datahub

Beyond the CERF Datahub, OCHA has also recently launched a Pooled Funds Data Hub that aims to increase the transparency of OCHA’s humanitarian financing mechanisms by providing a one-stop gateway to CERF and CBPF funding data. It allows users to analyze country-level allocations across OCHA Pooled Funds through an interactive interface, increasing the efficiency of information gathering and significantly enhancing allocation visibility and transparency.
