Collective Anticipatory Action

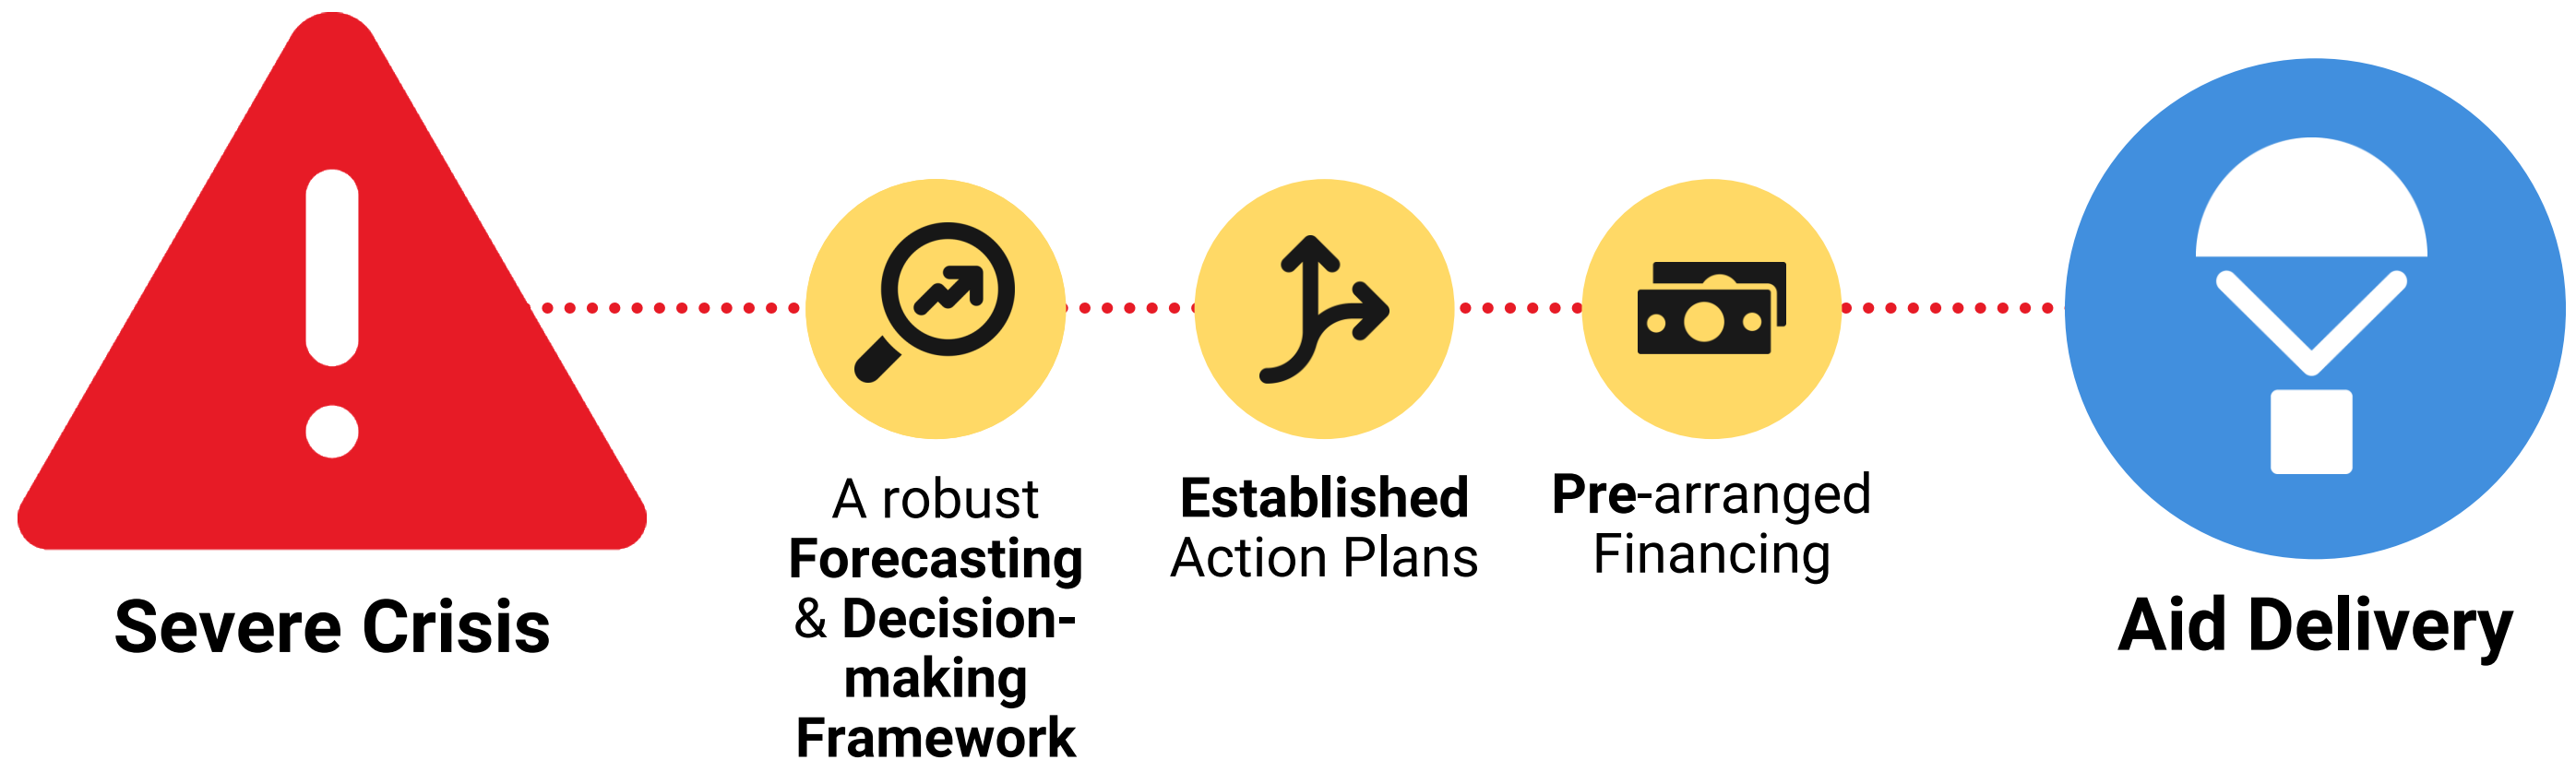

# Caseament Lecture: UN's vision of crisis financing

1. Increase the use of insurance products to have funds available exactly when they are needed
2. Effectively use pre-agreed, contingency financing from the UN and multilateral banks to release money the moment disaster strikes rather than ringing round asking for it afterwards.
3. Expand risk sharing with the private sector.
4. Ensure complementarity of development and humanitarian action
5. Make the existing humanitarian financing system more efficient
6. Learn lessons from the innovation and experimentation

# What does **traditional response** look like?

# What does anticipatory action look like?

# What does anticipatory action look like?

A robust  
**Forecasting  
& Decision-  
making  
Framework**

**Established  
Action Plans**

**Pre-arranged  
Financing**

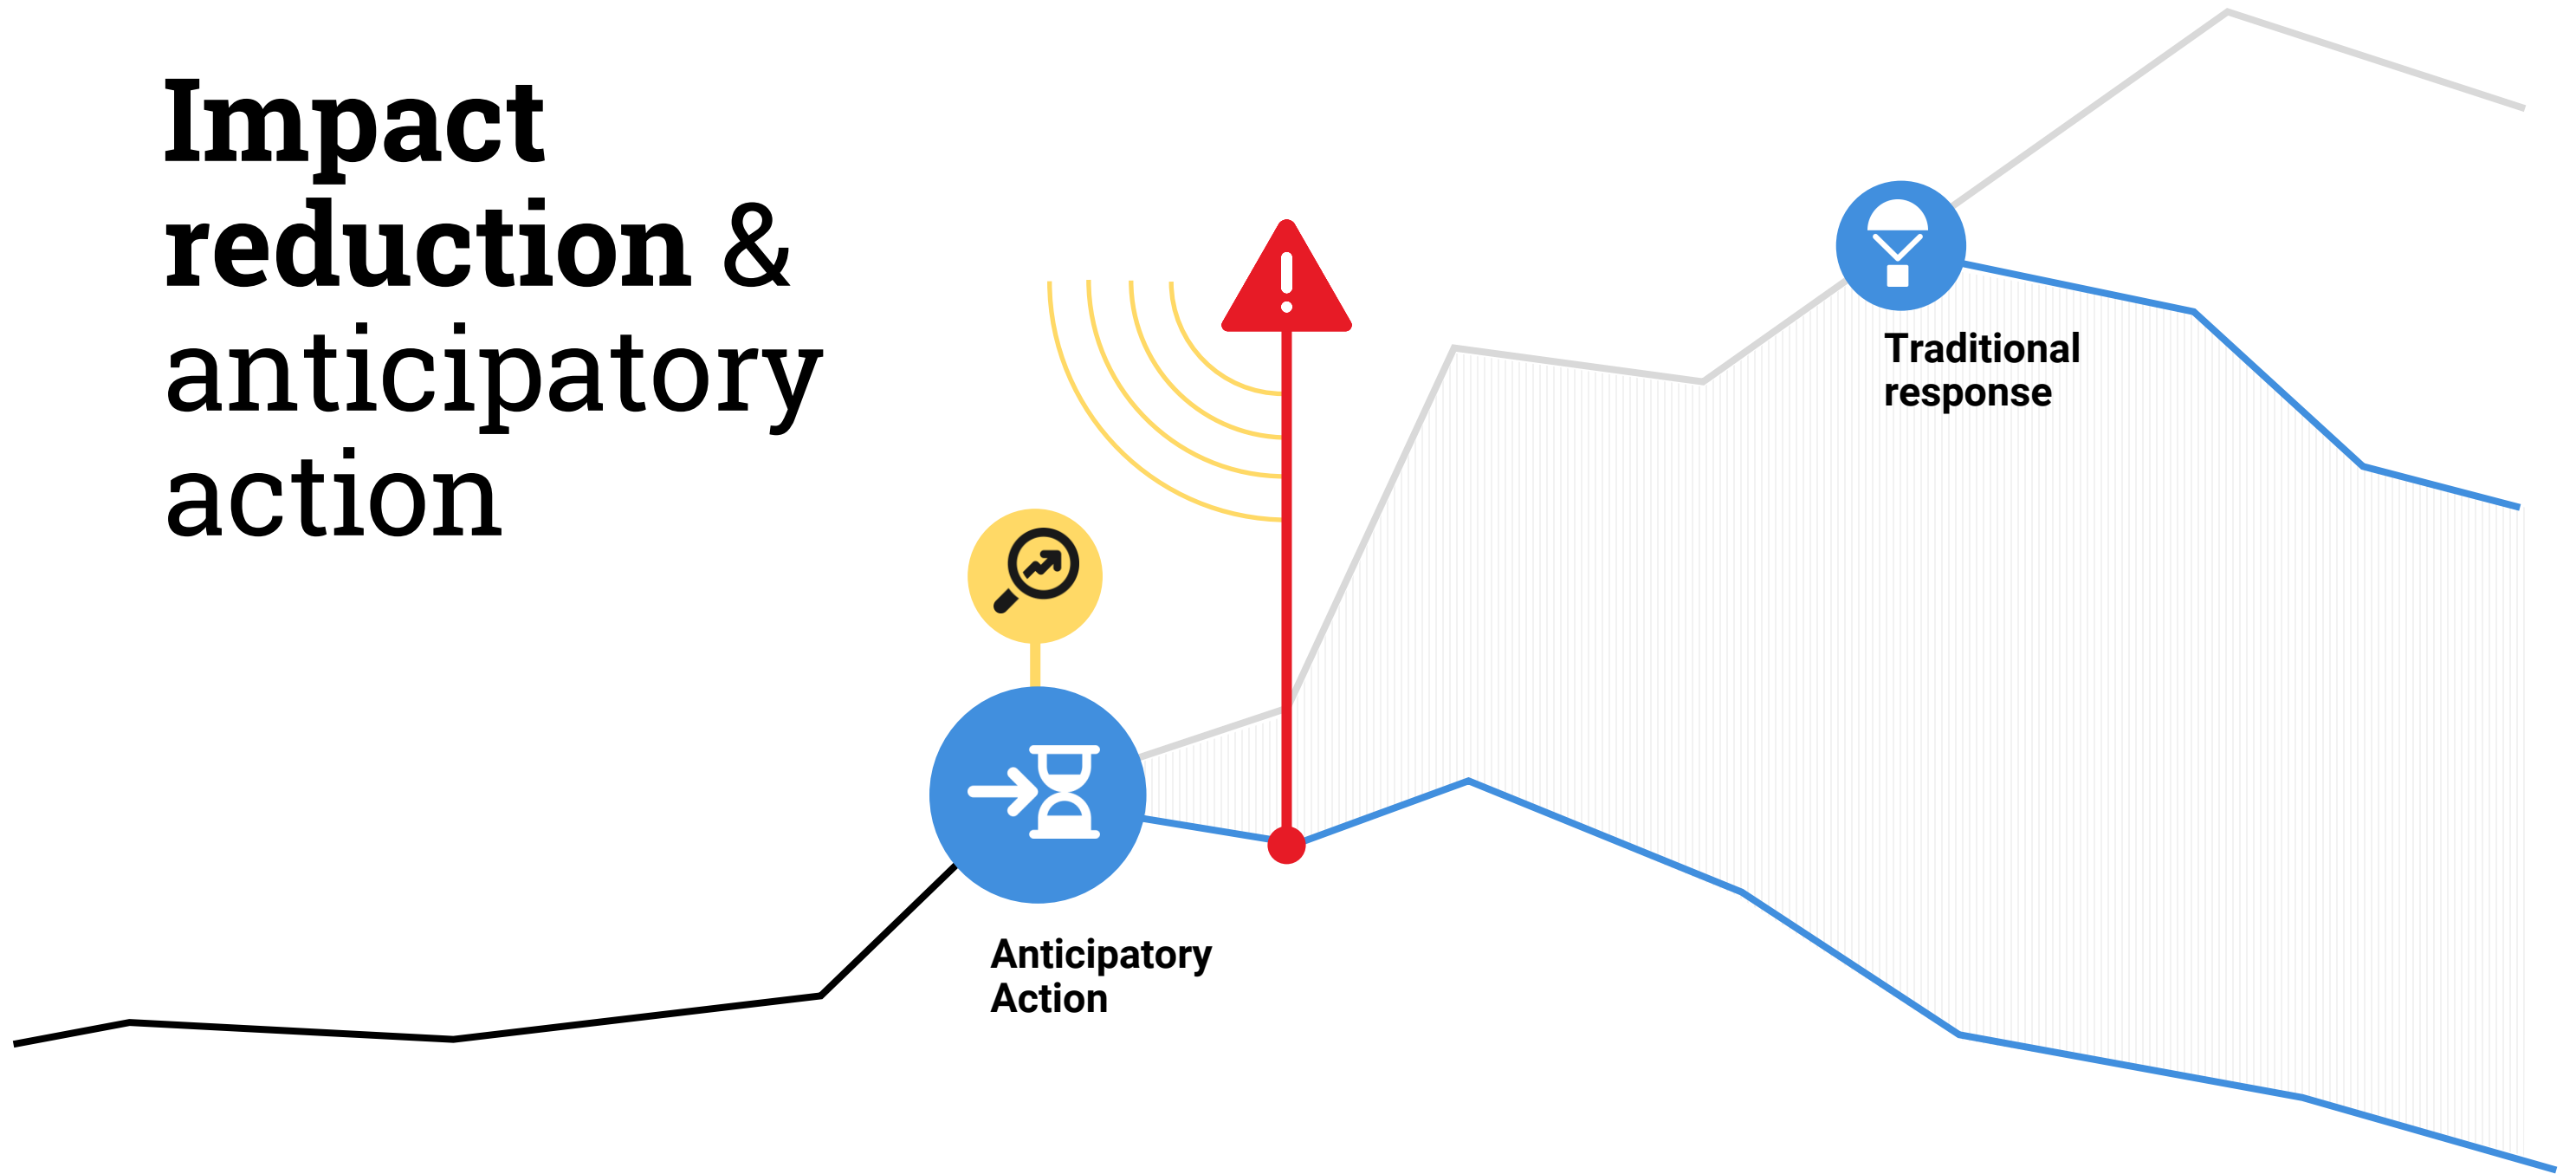

**Anticipatory  
Action**

**Reduced  
Crisis**

# Impact reduction & anticipatory action

# Rationale for anticipatory action

Reduce the humanitarian impact and the response cost

More dignified

Protect development gains

# Asking if anticipatory action **makes sense** for specific disasters:

Can you **predict**  
what's going to  
happen?

Do you have  
**feasible &  
impactful actions**  
in the prediction  
window?

Can you create a  
**plan backed by  
pre-arranged  
money?**

# Asking if anticipatory action **makes sense** for specific disasters:

If the answer is “no” to one or more questions,  
then anticipatory action **doesn't currently**  
**make sense for that specific type of disaster.**

But other potential prediction methodologies and triggers should  
be explored with forecasting experts, and new meaningful actions  
could be developed for the forecast window.
